

JEEVAN DEEP BORUGADDA

Dallas, Texas, United States | deep.jeevan21@gmail.com | (940) 843-8446 | github.com/g1d33p | linkedin.com/in/jeevandeeppb | jeevandeeppb.me

PROFESSIONAL SUMMARY

8+ years of combined program delivery, operations, and people-leadership experience. Experienced in leading multi-workstream AI/ML, GenAI, and data-platform initiatives across engineering, data, architecture, and business teams. Skilled in Agile/Scrum/Scrumban delivery, RAID governance, executive reporting, stakeholder alignment, capacity planning, and compliance/PII risk. Hands-on exposure to LLM evaluation, RAG pipelines, agentic workflow automation, and responsible AI, supported by PMP certification and an M.S. in Business Analytics.

CORE SKILLS

AI/ML & GenAI: AI/ML Program Lifecycle Management, LLM Evaluation, RAG Pipelines, Agentic AI Workflows, Responsible AI, Bias Auditing

Program Management: Agile, Scrum, Scrumban, Multi-Workstream Delivery, RAID Management, Program Governance, Change & Scope Management, Resource Allocation

Leadership: Executive & Technical Stakeholder Management, Cross-Functional Leadership, Escalation Handling, KPI Tracking, Capacity Planning

Technical: Python, SQL, Java, FastAPI, LangChain, sentence-transformers, XGBoost, SHAP, Streamlit

Cloud & Data: AWS, GCP Vertex AI, SageMaker, EKS, Lambda, S3, SQS, ChromaDB, Aurora

Tools: Jira, Git, Docker, Tableau, Google Sheets, Mural, PowerPoint, Excel, n8n

PROFESSIONAL EXPERIENCE

Saayam For All | Technical Program Manager | Mar 2026 – Present

- Lead multi-workstream AI/ML program delivery, coordinating a 35+ member volunteer PM team and mobilizing 500+ global contributors to build an AWS-native AI and data microservices platform using Python, Java, EKS, SageMaker, and GenAI.
- Drive Agile delivery across AI engineering, data, and architecture workstreams using a structured Scrumban framework covering sprint planning, stand-ups, retrospectives, WIP limits, capacity-based task pulling, and XS–XL effort sizing.
- Act as the primary interface between business and IT leadership, aligning competing stakeholder priorities, tracking delivery KPIs, and proactively removing blockers.
- Operationalized an enterprise-wide PMO reporting framework through a 33-point platform audit, standardizing project charters, resource utilization tracking, and remediation plans for PII/GDPR compliance.
- Govern RAID registers end-to-end, translating technical risks into management decisions and maintaining delivery accountability.

Paisa Agent — paisaagent.ai | Product Manager | Jul 2026 – Present

- Lead end-to-end 0-to-1 AI/ML product delivery for a proprietary mobile finance application, from planning through execution and monitoring; author BRDs, GTM strategies, pricing models, and competitor analyses.
- Serve as the primary interface between business stakeholders and delivery teams, translating financial-services requirements into implementation plans, compliance-ready technical specifications, and measurable engineering milestones.
- Map user workflows, surface technical dependencies, and design RAID-aligned mitigation strategies for a regulated banking environment.
- Drive product governance and operational discipline through executive-ready delivery plans, scope documentation, and cross-functional alignment.

Tata Consultancy Services (KPMG Engagement) | Operations Analyst | Jun 2023 – Dec 2023

- Coordinated distributed technical teams across 58 global member firms, managing stakeholder relationships and proactive communication to maintain ~98% platform availability.
- Designed executive delivery-status reporting, translating platform data into actionable dashboards that improved stakeholder visibility and reduced escalation lag.
- Governed RAID logs and delivery metrics, performing root-cause analysis to remediate operational bottlenecks and mitigate cross-functional risk across global time zones.
- Maintained runbooks, release notes, FAQs, and engagement documentation to support accurate, current, and audit-ready operations.

Wipro (Meta Engagement) | Delivery Coordinator | Oct 2021 – Dec 2022

- Owned sprint-health tracking and backlog management for a 12-member Agile team, facilitating sprint ceremonies and reinforcing delivery standards.
- Built KPI dashboards tracking defect density, cycle time, and release readiness to improve sprint planning accuracy and delivery visibility.
- Facilitated cross-functional defect triage with engineering, operations, and product stakeholders to drive issues through resolution.
- Performed detailed defect validation and produced accurate bug reports against strict quality thresholds before release.

Amazon | ERC Sr. Associate | Feb 2021 – Jul 2021

- Achieved ~95% First Contact Resolution and redesigned call scripts, improving handle time by ~26%.

- Supported employee-facing operations through structured issue resolution, clear communication, and adherence to service-quality standards.

ICICI | Sales Associate | Nov 2020 – Jan 2021

- Supported customer-facing sales activities and relationship management within a banking environment.
- Managed customer interactions, communicated product information, and supported follow-up activities to maintain service quality.

Tech Mahindra | IT Analyst | Jul 2019 – Oct 2020

- Achieved ~97% resolution rate and was recognized as Best Employee of the Project 3x.
- Improved CSAT by 15% through structured issue resolution, customer communication, and consistent service delivery.

LEADERSHIP EXPERIENCE

Anno Domini | Lead | 2016 – 2019

- Led a 30–40 member college band, coordinating people, schedules, rehearsals, logistics, and participation across intercollegiate competitions.
- Balanced competing priorities and deadlines while keeping a large student team aligned around scheduled performances and competitions.

University of North Texas — ISSS | Student Assistant | Jan 2025 – Dec 2025

- Supported International Student and Scholar Services operations while balancing academic responsibilities and maintaining accurate, timely administrative support.
- Coordinated with students and office stakeholders, handling routine requests and supporting day-to-day service delivery.

SELECTED AI/ML PROJECTS

LLM Evaluation & Responsible AI Suite

- Benchmarked Llama 3.1 vs. Mistral across quality, latency, and fairness KPIs; conducted bias audits that cleared LOW risk across 3 parity scenarios.
- Orchestrated A/B prompt-engineering tests yielding a 25.8% quality improvement and established responsible-AI standards and production prompt libraries.

Local RAG Assistant (Citations & Golden-Set Evals)

- Scoped product requirements and delivered an end-to-end RAG pipeline for unstructured-data ingestion, PDF chunking, and embedding.
- Implemented source-only answering, refusal logic, and audit trails, validated through a golden-set evaluation framework.

AI PM Ops Copilot (Agentic Workflow & HITL Governance)

- Built a 0-to-1 agentic workflow for complex data-input processing with Human-in-the-Loop approval gates for data quality, compliance, and traceability.
- Reduced manual workflow preparation time by half while maintaining structured quality controls.

Enterprise AI Recruiting Agent (Autonomous Talent Pipeline)

- Managed strategic delivery of an autonomous AI agent supporting talent-sourcing workflows and generating tailored CVs and recruiter connection notes from job descriptions.

Multi-Modal Autonomous Agent & Desktop OS (LiveKit, Hermes & Gemini)

- Architected and delivered a local-first multi-modal AI agent system integrating LiveKit real-time voice streaming, Google Gemini, and native macOS desktop automation (Mail, Calendar, Reminders).
- Engineered hybrid cloud-edge orchestration with multi-tier token governance, cutting API spend >90% via script short-circuiting, with background daemons and strict Human-in-the-Loop (HITL) safety controls.

Bank Telemarketing Propensity System (ML Delivery & Decision Support)

- Directed product strategy and full SDLC delivery using CRISP-DM; defined scope, mapped dependencies, and executed the rollout plan.
- Captured ~49% subscriber uptake in the top 10% of contacts and delivered an estimated ~\$190K in campaign cost avoidance; built Tableau dashboards translating model performance for non-technical stakeholders.

EDUCATION

University of North Texas | M.S., Business Analytics | Jan 2024 – Dec 2025

CERTIFICATIONS & ACHIEVEMENTS

- **PMP® (Project Management Professional)** — Project Management Institute
- AI Security and Governance — Securiti AI
- GenAI Apps & Agents on GCP with Vertex AI (& Flutter) — Nov 2024
